WEST TENNESSEE RAILROAD

Working to make your business grow . . . is what keeps us growing !

Partnership - The Competitive Edge

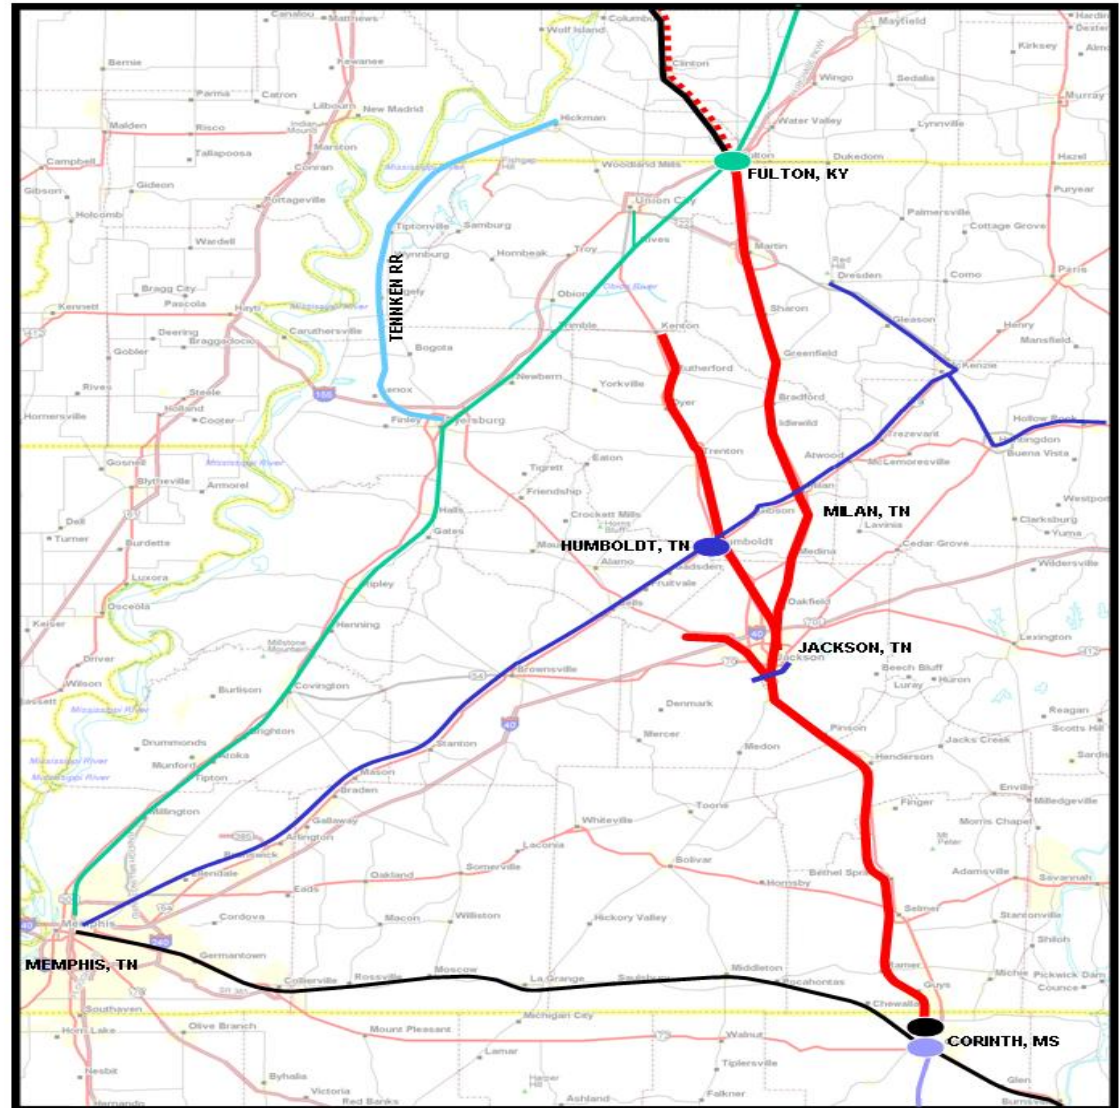

We Connect YOU With **FOUR CLASS I GATEWAYS**

The **WEST TENNESSEE RAILROAD** wants to offer you a **Partnership in Transportation** . . . Not just service. Access to strategic markets, efficient industrial site selection as well as reliable movement of raw materials and finished products are all elements of this **Partnership**.

Our local management team is in the City of Jackson and equipped to make local service decisions.

Our dedicated employees understand that **SERVICE** to the customer is not **PART** of the job it **IS THE JOB**.

We can bring insight into state, regional and local government resources. Furthermore we can facilitate interface with Class I railroads, in particular regarding rate negotiations, car tracing and the like. An informed Marketing/Industrial Development Team is waiting for your call. Ready to act as your direct and discrete liaison, ready to be **listening to problems** and ready to be **delivering solutions**.

Tennken Railroad
Company

Memo

Re: Project Goose

The **Tennken Railroad [TKEN]** will provide rail service to the former Georgia Gulf building in Tiptonville, TN in this regard it may be helpful to consider the following:

TKEN interchanges with the CN railroad at Dyersburg, TN, with whom it has a strong working relationship.

TKEN has been operating in Dyersburg 23+ years of continuous service, operating 54+ miles of track.

TKEN current ships a range of commodities including grain, petroleum oils, coke, plastics and steel

TKEN maintains and operates a switching yard in Dyersburg and can provide car storage

TKEN currently provides service to the Port of Hickman, KY and anticipates providing service to the Port at Cates which is slated to be operational in the near term.

TKEN currently provides service to the Tiptonville area on an "as needed" basis and can provide daily service if supported by the number of carloads.

TKEN is pleased to provide contact with current customers to attest to the quality and level of our service

TKEN maintains management and staff at its yard office in Dyersburg as well as executive management in Sea Bright, NJ along with its associated railroads in west Tennessee.

TKEN cost of operation is competitive with locations on Class I properties and its service and attention to customer needs is superior.

West Tennessee
Railroad Co.

Memo

Re: Project Goose

The West Tennessee Railroad [WTNN], will be pleased to provide rail service to these sites; Martin Spec Bldg and Gordon Food Bldg in Martin as well as the Quebecor Bldg and Trenton Spec Bldg in Trenton.

In the above regard it may be helpful to consider the following:

- WTNN has been an operating railroad for 20+ years of continuous operation.
- WTNN local management and operating staff are located at its switching yard in Jackson, TN, its executive and administrative staff are located in Sea Bright, NJ.
- WTNN operates in excess of 230 miles of track and moves 18000+ carloads of traffic annually. Shipments include grain, steel, chemicals, paper, wood, scrap metal, plastics and various finished merchandise.
- WTNN has **FOUR CLASS I INTERCHANGES**
 - **CN** Railroad at Fulton, KY
 - **CSX** Railroad at Humboldt, TN
 - **NS** Railroad at Corinth, MS
 - **KCS** Railroad at Corinth, MS
- WTNN maintains a strong working relationship with each of the major Class I railroads in the eastern United States.
- WTNN with four Class I connections provides a unique and unmatched competitive advantage to the customers on its line as follows:
 - Unique pricing competition for inbound and outbound products
 - Unique insurance against being captive to circuitous routing on a single railroad

- WTNN is pleased to provide contact with current customers to attest to the level and quality of our current service.

Please see our marketing brochure for maps and additional information about the communities and industries we serve.
